

Purpose: Decide on Jabber library, set up protocol meeting

Time: September 24, 2004

Location: Sun Lab

Secretary: Steven Montgomery

Present: Brandi, Matt, Jason, Jonas, Steven

Guests: none

Items Discussed:

Web page

- Access issues delay. Have draft by Monday
- Brief discussion of webpage needs

Protocol documentation

- Jonas will review the document and make a preliminary judgment on what needs to be covered.
- Waiting on copies being created by the print-shop, via Lynn

Response to emails

- Everyone should respond to emails about scheduling, whether the time is ok or not.

Jabber Protocols

- Matt has briefly reviewed several protocols, but did not have a recommendation as of yet.

Access rights on SourceForge and Config Manager

- SourceForge access rights do not make it easy to restrict access to web space without denying access to other areas needed by all developers.

Use Cases

- First rough draft handed out by Jason and briefly went over the cases.
- Discussed collision handling. Sending whole objects and clients accept latest time-stamped as current. Need to handle rare case in which two clients change the same object at the exact same time.
- Need to investigate message lose recovery done in Jabber and decide if we need to do more.
- Discussed transmitting first snapshot at initial sharing. Need to open a new Inkscape window if there is anything in the current window.

Schedule meeting to discuss protocol

- September 29th, Wednesday, 10pm

Email convention

- Always include the phrase "Senior Project" in any emails you send regarding this project

Tasks assigned:

Supplemental Specification or Updates to Use Case (**Jason**)

- Use Cases are more important. If changes are required by client, make changes before working on Supplemental Specification
- Would like to omit UML from use cases

Vision Document (**Brandi**)

Risk Assessment Document (**Jonas**)

Configuration Management Plan (**Steven**)

Project Statement Materials/UI Prototype (**Matt**)

Next Meeting:

September 29th, Wednesday, 10pm

Sun Lab

- Discuss protocol document

October 1, Friday, 10th hour

Sun Lab

- Discuss documents assigned
